BE IT ENACTED BY THE LEGISLATURE OF ALABAMA:

reclamation operations on federal lands pursuant to the Surface Mining Control and Reclamation Act (SMCRA) and the Mineral Leasing Act of 1920 (MLA).

(2) The United States Department of the Interior Office of Natural Resources Revenue (ONRR) collects royalties and other revenues from coal production on federal lands and pays a portion of this revenue to the state where the mineral was extracted.

(3) The primary intent of the royalties is to compensate states that host federal mineral extraction activities, including the communities most impacted by mineral extraction. Costs to these communities, include, but are not limited to, infrastructure, increased demand on public services, and workforce-related costs.

(4) The McDuffie Coal Terminal at the Port of Mobile serves as the primary export terminal for coal extracted from federal lands in Alabama, handling the majority of coal shipped from mining operations in coal-impacted communities. Infrastructure improvements and maintenance at the Port of Mobile are essential to maintaining the competitiveness of Alabama's coal industry, ensuring efficient market access for coal production, and supporting the broader economic ecosystem dependent on coal mining activities.

(5) It is the intent of the Legislature, by the passage
